

## Máximo García Aroca

---

Málaga, 29006 • maximo.garcia.aroca@gmail.com • (+34) 601 04 01 14 • <https://github.com/d4str3k>

### Education

#### University of Málaga (UMA)

Málaga, SP

##### Computer Engineering

2020 - Present

##### Bachelor's Thesis (in progress):

- Design and implementation of a ransomware detection module based on Logical Block Addressing (LBA) access patterns in Linux.

##### Academic Distinctions:

- Computer Technology: processor design, assembly programming, information representation in computer systems, and development of single-cycle and pipelined processors.
- Object-Oriented Programming (Java).
- Computer Control: Modeling and analysis of dynamic systems, feedback control, stability analysis and controller design.

### Experience

#### VulnZoo — IoT Cybersecurity Training & Research Lab

Professional Project

##### Developer/Security Researcher

2025–Present

- **Presented VulnZoo at Black Hat USA 2026 Arsenal**, showcasing a complete vulnerable IoT ecosystem for security research and training.
- Designed and developed an IoT cybersecurity platform with multiple laboratories (automotive, industrial, medical and so on) for hands-on vulnerability assessment and security training.
- Built the platform using **Raspberry Pi, OpenWrt, Flask/Python, MongoDB, SQLite, Docker and Android**, integrating vulnerable embedded, web and mobile components.
- Implemented and documented reproducible attack scenarios covering **OWASP IoT Top 10, OWASP API Top 10 and OWASP Mobile Top 10 risks**.

#### Inode-based File System Design (FUSE)

Academic Project

##### Lead Developer

2024–Present

- Architected a custom file system using inodes.
- Integrated FUSE framework to enable user-space file system operations.

#### Netathon: Corporate Network Design

Hackathon

##### Network Engineer Student

2024

- Designed and deployed a secure corporate network using Cisco infrastructure.

#### Cybersecurity CTF Competitions

Hackathon

##### UCA Cybersecurity Day

2021

- Ranked **14th** in the UCA Cybersecurity Day CTF.

### Technical Skills

**Programming:** C, C++, Python, Bash, Java, SQL, JavaScript.

**Tools/Technologies:** Git, Burp Suite, Docker, VirtualBox, VMware, OpenWrt.

**Cybersecurity:** Web/API security testing, IoT security, vulnerability assessment, OWASP methodologies.

**Networking:** Cisco IOS, network security, Wireshark.

**Language:** Spanish (native) and English B2 (Cambridge English).
